Reliable and energy saving at a great price with OSRAM bulb.

SEE THE WORLD IN A NEW LIGHT

OSRAM DuluxStar® :
Energy for every day.

Up to 80% energy savings and 15 times the life of ordinary light bulb. Osram DuluxStar® ranges meet all the requirements for normal everyday use in the home. They are available with an E14, E27 or B22d base with various sized and wattages from 5W to 30W.

Innovative, creative, economical: Lighting solution with LED systems

OSRAM LED systems are extremely low-profile elegant lighting solution due to low height, simple installation and ease of integration into the architecture. It is ideal for illumination heat-sensitive materials, for example in, museums, or for operation with solar power and batteries.

Lumilux fluorescent lamp: First choice for durability.

For economical reasons they are the first choice for many applications because they combine high luminous efficacy with low power consumption. A LUMILUX lamp, for example, needs only around 15% of the electricity that an ordinary light bulb needs. Low power consumption and long life mean that fluorescent lamps are kind to the environment.

More than energy-saving: OSRAM Electronic control gear inexpensive, versatile and reliable.

OSRAM ECGs have been successfully used for providing reliable energy-saving lighting for many years in millions of applications in all the major sectors. OSRAM ECGs are the preferred choice of commercial users for permanent economical lighting in shops, offices and industry. Low energy consumption is good not only for the economy of lighting systems but also for the environment. ECG operation extends lamp life, provides flicker-free light and flicker-free shutdown at end of life.

From The Editor's Desk

The world Economic Meltdown has been the topic of today for quite a while. We are faced with unforeseen impacts and no one can predict the exact outcome of the financial storm. The price of commodities has plummeted in tandem with the turmoil. The only consolation is the lower oil price. Unfortunately the sudden change in copper price to low levels had caused another difficulty in the industry.

On the matter of compiling prices for our electrical items, we continue to seek your support and cooperation so that we can establish the price index to benefit all of us in the future. TEEAM will like to thank everyone who has been contributing to this information compilation.

The training course in Energy Efficiency (EE) with the Association for Overseas Technical Scholarship, Japan (AOTS) had been a great success based on the remarks by the participants. We hope to persuade AOTS to organise another similar course in the near future.

The Ministry of Energy, Water and Communications is embarking on the drawing up of Energy Efficiency Master Plan this year. This effort is to further enhance the development of EE in the country. The Ministry will also request the Finance Ministry to allocate fund for EE in the Financial Stimulus Package.

The Efficient Management of Electrical Energy Regulations 2008 was gazetted on 15th December 2008. This means that the Regulations can be enforced under the Electricity Supply Act 1990.

TEEAM is honoured to host the 2009 AFEEC/FAPECA Conference & Meeting in Kuala Lumpur from 15th to 17th July 2009. This is in conjunction with the Asean Elenex 2009 Electrical Engineering Exhibition. TEEAM also intends to host the IFEC meeting in Kuala Lumpur taking the opportunity to meet our counterparts from Europe, USA and the South America. Please plan your participation in the events and help us to make the events memorable for our foreign guests.

As members of TEEAM, we hope you will be willing to share your successes in business and technical achievements. We look forward to articles from our members so that we can publish the good practices that will ensure the sustainability of the trade.

Regards,

Ir Chew Shee Fuee

TEEAM 56th Anniversary Dinner

On 23rd August 2008, TEEAM celebrated its 56th anniversary at One World Hotel, Petaling Jaya. Some 1,070 guests and members attended the dinner celebration. Dato' Sri Prof Ir Dr Judin Abdul Karim, Director General of Public Works Malaysia graced the occasion as the Guest of Honour.

The dinner theme, "Towards Green Energy" was chosen to remind everyone that global warming due to climatic change as a result of emission of excessive fossil carbon is reaching an alarming state. TEEAM President, Dato' Ir Lee Peng Joo highlighted that cutting waste, reduce energy losses and going for higher energy efficiency is one of the practical and least expensive solutions to meet growing energy demand. In view of rising energy cost and the need for sustainable energy in the future, going for renewable energy like solar, biomass, capture landfill gases, converting municipal waste and hydro power into green energy must be given priority and the government must give strong support.

Malaysia may consider nuclear energy as it is a cheaper energy cost per kwh compared to coal and gas fuel. It is more environmentally friendly as it emits less green house gas and modern technology now makes it very safe to operate.

Dato' Lee went on to urge the Ministry of Works to urgently implement the proposed Payment Adjudication Act to help the construction industry to resolve the long outstanding payment issue. Countries like Australia, New Zealand, United Kingdom and Singapore have implemented such law many years ago and Malaysia is slow in this aspect. The recent announcement of direct payment to suppliers and subcontractors by the Honourable Prime Minister and Minister of

TEEAM President – Dato' Ir Lee Peng Joo delivering his speech during the dinner.

Finance showed how serious payment problem is in the construction industry.

Dato' Sri Prof Ir Dr Judin Abdul Karim highlighted in his keynote address that steps are being taken to ensure a more sustainable source of energy for the future. The need to conserve and improve efficiency in the usage of electricity is becoming prominent. Recycling is a way to conserve the environment and energy efficient buildings can reduce the requirement in electricity generation and carbon emission.

As to the Payment Adjudication Act, the government through CIDB has introduced it to help to protect the interests of all parties. The escalation of material prices is another issue highlighted at the dinner. TEEAM is working closely with CIDB on the building material price index. Dato' Sri Prof Ir Dr Judin expressed that the government will be the first to apply the price escalation mechanism so that contractors can complete their projects in a timely manner. To ease the burden of contractors affected by the rising cost of building materials, the government has agreed to include fourteen key construction materials for variation of price (VOP). For mechanical and electrical works, VOP will be backdated to 1st January 2008.

Dinner Organising Chairman – Mr David Chong Ah Nyap.

Earlier in the evening, Dinner Organising Chairman, Mr David Chong Ah Nyap who is also TEEAM Vice President thanked and appreciated every effort from the Organising Committee Members, all supportive sponsors and most of all the Fund Raising Chairman, Mr Michael Oan Cheng Hoe for his remarkable effort.

Highlights of the celebration were the presentation of appreciation awards to all the dinner sponsors and long service awards to Council and Committee Members as well as Secretariat staff in recognition of their contribution to TEEAM. Guests and members were entertained by the "Shanghai Angels" who sang oldies and current hit songs. While energetic dances were performed by Ichiro Dance Troupe. There were three rounds of lucky draws for guests and members to try their luck. Grand prizes comprising Sony 32" LCD TV, Samsung 29" Slim Fit CTV, Olympus 8MP Digital Camera and I-pod Nano MP3 Player were given away.

TEEAM extended its sincere thanks and appreciation to all generous dinner sponsors, distinguished guests, members and the Press for their kind attendance, support and contribution. All dinner sponsors are acknowledged on page 15.

WORLDWIDE PARTNER

Asia Invest MATELEC 2008 Business Meeting

TEEAM in collaboration with the Spanish Association of Electrical Equipment Manufacturers (AMEC-AMELEC) organised a business matching event during MATELEC 2008, an international electrical and electronic equipment exhibition in Madrid, Spain from 29th to 30th October 2008. Members of TEEAM were invited to participate in pre-arranged meetings with prospective European companies.

This event was co-funded by the European Commission under the Asia Invest Programme. It aimed to promote and support business cooperation between European Union and Asia. Partners of AMEC-

AMELEC for this project were TEEAM-Malaysia, IEEMA-India, TEMCA-Thailand, AICC-Afghanistan and Consorzio Italiasa (Italy).

50 Asian companies from Malaysia, India, Thailand and Afghanistan had individual business matching meetings with 30 European companies. Air tickets and hotel accommodation were co-funded by the European Commission. Ten Malaysian companies which are members of TEEAM participated in the business meetings.

TEEAM Vice President, Mr Yap Ching Kiat led the Malaysian delegation. They are:

- Anika Controls Electrical Engineering Sdn Bhd
- EITA Power System Sdn Bhd
- Gorasia Industries Sdn Bhd
- JT Power Electrical Sdn Bhd
- Jana Tenaga Samutra Sdn Bhd
- KVC Industrial Supplies Sdn Bhd
- Lightning Power Surge Protection Sdn Bhd
- SP Multitech Sdn Bhd
- Speco Bumi Elektrik Sdn Bhd
- Wise Pro Sdn Bhd

Overall the meetings were fruitful. TEEAM would like to extend its gratitude and appreciation to AMEC-AMELEC and the European Commission for the opportunities to participate in the event.

For the album – TEEAM delegation at the business meeting venue.

Sightseeing – Delegates took the opportunity to visit some tourist spots in Spain.

At the exhibition – Mr T Sundararaju (Managing Director of Speco Bumi cum TEEAM Council Member) visiting MATELEC 2008.

Power-Gen Asia 2008

Power-Gen Asia 2008, the premier conference and exhibition for the power generation, transmission and distribution industries in South East Asia was held from 21st to 23rd October 2008 at Kuala Lumpur Convention Centre, Malaysia. The event was organised by PennWell Corporation and TEEAM was one of the supporting organisations.

Power-Gen Asia 2008 – Visitors at the exhibition ground.

The exhibition attracted a full house of exhibiting companies with over 150 organisations from 50 countries. They showcased a wide range of products and services with the latest technology in power engineering.

The conference addressed and discussed strategic and technical issues surrounding the challenges ahead for regional governments and the industries. It covered a broad range of topics over four conference tracks, from electricity market finance and planning to regional energy resources, and power plant technologies to operating and servicing plants.

Following this year's conference theme which looks at the regional nature of possible solutions to power demand, a diverse range of topics were discussed by an equally broad range of international speakers, from traditional fossil fuel technology to the developments in green and renewable power generation.

The strategic and technical content provides great information and educational opportunities for all power industry executives to observe, learn and update their skills and knowledge of emerging technologies and key topics that will affect the future of the region's power generation industry.

Guest of Honour, YB Dato' Shaziman Abu Mansor, Minister of Energy, Water & Communications, Malaysia gave an opening keynote address.

The increase in demand for electricity in Malaysia is forecast at 7.8% per year to reach 20,087 MW by 2010. The Ministry of Energy, Water & Communications, Malaysia aimed to increase installed capacity to 25,258 MW. In the Ninth Malaysia Plan, the Ministry will continue to further enhance sustainable development of the energy sector through an optimal energy mix and improving the performance of the transmission system, to enable it to contribute towards strengthening economic growth.

Power-Gen Asia 2008 was a good platform for display of products and services, excellent networking opportunity and an experience for developing the skills and knowledge of the power industry professionals.

The next Power-Gen Asia is scheduled for 7th to 9th October 2009 in Bangkok, Thailand. For information on Power-Gen Asia 2009, please visit www.powergenasia.com.

JCAA Trade Mission

A 15-member trade mission from the Japan Power Cable Accessories Association (JCAA) visited Malaysia on 20th and 21st November 2008. The Japanese aimed to exchange information on the latest cable and accessories technology and standards with foreign countries. Members of JCAA consist of power cable and accessories manufacturers, electrical power companies, electrical construction companies and material suppliers in Japan.

The delegation was led by Mr Naomi Ikegami, Chief Engineer of Distribution Cable Accessories Department, JCAA. The companies include J-Power Systems Corporation, Fujikura Ltd, EXSYM Corporation, Furukawa Electric Co Ltd, Kowa Kogyo Mfg Co, Ltd, Fujikura Components Ltd, Chubu Electric Power Co Inc, Mitsubishi Cable Industries Ltd, Furukawa Power Components Inc, Inoue Manufacturing Co Ltd, Kandenko Co Ltd, Asahi Electric Works Co Ltd, Sumiden Asahi Industries Ltd and Dyden Corporation. They are represented by personnel from the power and telecommunication cable engineering division.

Visit to TEEAM

JCAA visited TEEAM on 21st November 2008. On hand to receive them were Engr Fu Wing Hoong (Deputy President) and some TEEAM officials as well as members. Over the years, TEEAM has developed a good and mutually beneficial relationship with many organisations, both nationally and internationally, and the visit by JCAA was another meaningful event which will further strengthen the relationship and cooperation between JCAA and TEEAM.

Both JCAA and TEEAM have made collaboration efforts in training such as cable construction and cable jointing courses in the past years. The Malaysian construction personnel had benefited from the technical know-how from JCAA experts. Cable failure has been identified as one of the primary contributors to unsatisfactory power system performance. Hence TEEAM believes such training collaboration is beneficial to the industry to ensure a reliable distribution system.

Later Mr Naomi Ikegami gave a presentation on the overview of the electricity industry in Japan. He also highlighted the type of cable accessories, performance, and the list of JCAA standards. The activities of JCAA were also highlighted. Earlier, the mission has requested for a presentation from Conway Terminals Manufacturer Sdn Bhd. Its Managing

For the album – A group photo taken at the end of the visit to TEEAM.

Director, Mr Ng Choon Guan and Manager, Mr William Chang highlighted their cable lug products.

Visit to Letrik P J Union

After visiting TEEAM, the mission proceeded to visit Letrik P J Union Sdn Bhd. They were accompanied by Mr Jack Soon Lee Hock (TEEAM Assistant Honorary Secretary).

At Letrik P J Union, the mission was warmly welcomed by Mr Wong Thian Siong (Executive Director), Mr Fong Mun Loon (Executive Director), Mr Ong Song Kuan (Technical Adviser), Mr Lee Seng Chit (Testing Engineer) and Mr Ricky Raman Sundara (Qualified Jointer). Letrik P J Union's core business is in the provision of an integrated package of specialised mechanical and electrical installation works and engineering services. The discussion focused on cable

and cable accessories technology and cable jointing techniques practiced in Malaysia.

Visit to TNB

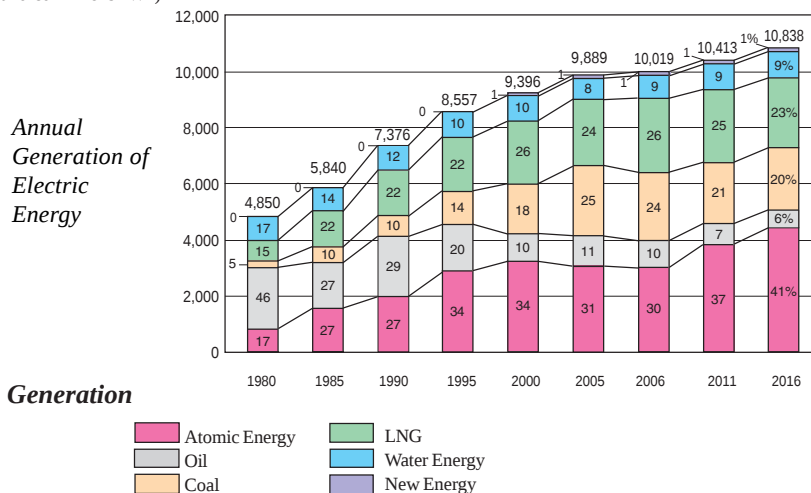

The JCAA mission earlier paid a visit to TNB Distribution Division Kuala Lumpur on 20th November 2008. They were welcomed by Ir Kamaliah Abdul Kadir (General Manager), Mr Ng Seng Kiang (Deputy Chief Engineer) and other TNB officers. Ir Chew Shee Fuee (TEEAM Immediate Past President) was also present to accompany the mission. They were briefed on the operation of the distribution division before visiting a sub-station.

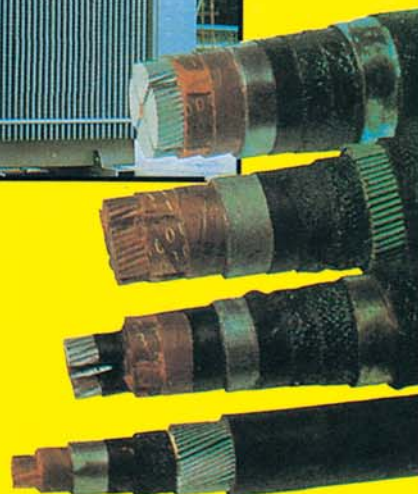

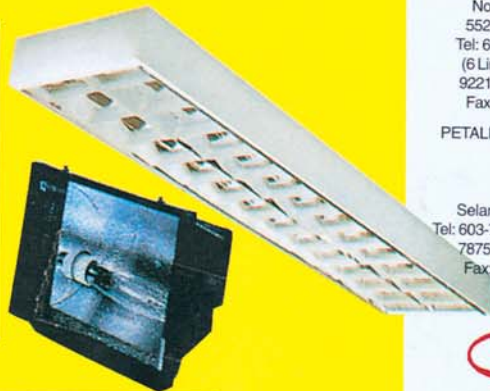

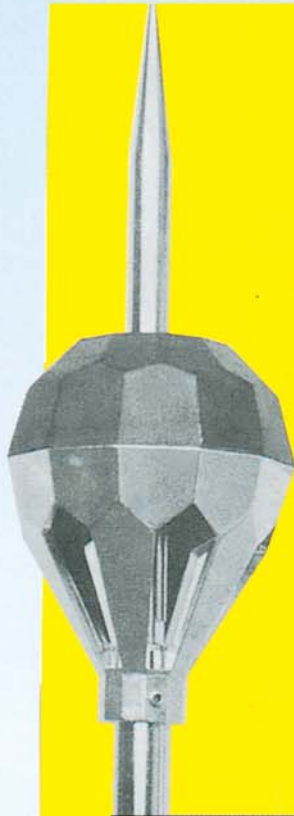

Conclusion

Overall the visits were fruitful for information exchange and for building a strong working relationship. TEEAM wishes to record its appreciation to TNB and Letrik P J Union for their kind arrangements and warm hospitality.
