FURUTEC™

Busduct System

An Efficient Power Distribution System with Japanese Technology

Furutec HP-Busduct System features double-bolt joint design and fire resistance with Japanese technology, manufactured by Furutec Electrical Sdn Bhd, a wholly owned subsidiary of EITA Group of Companies.

Unique Features

Double-Bolt Joint Design

Has sufficient electrical contact area and even contact pressure applied on conductors.

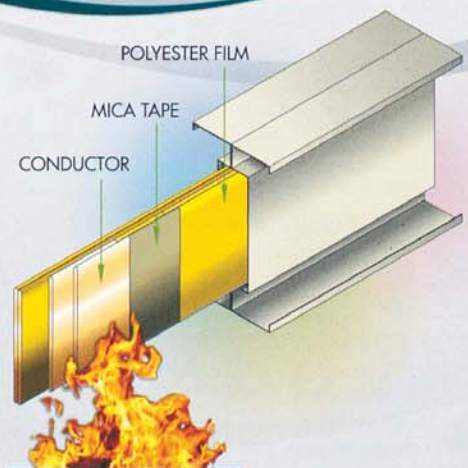

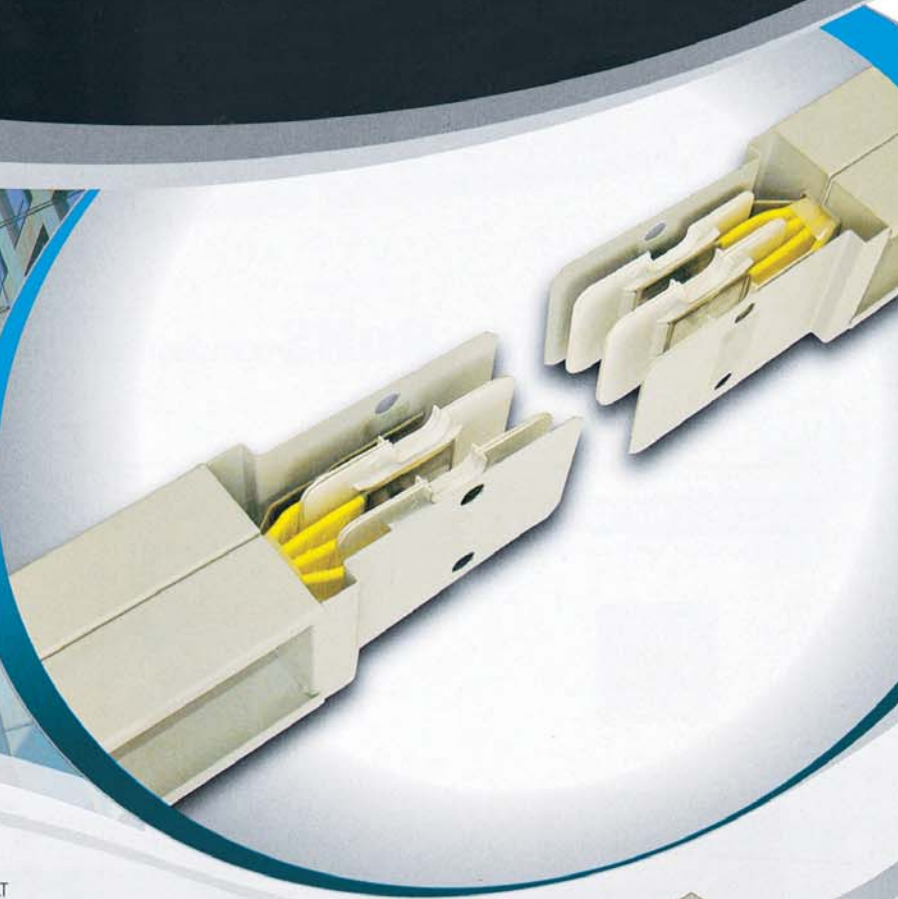

Generates less heat as compared to joint stack and bolt-through joint system.

FURUTEC™ Electrical Sdn. Bhd. (057207-W)

(member of EITA Group of companies)

Plot 89, Lorong Perindustrian Bukit Minyak 11, Kawasan Perindustrian Bukit Minyak, MK 13, 14100 Seberang Perai Tengah, Penang, Malaysia. Tel: +604-508 0228 Fax: +604-508 0227

E-mail: furutec@eita.com.my Website: www.furutec.com.my

Fire Resistant Busduct

JIS A 1304 - 840°C in 30min in a furnace.

BS6387 (Adoption) - 950°C in 3 hours.

NEW!

CE approved

RoHS compliance

BASIC FEATURES

- Multi-input and multi-range performance
- Small instrument depths (62mm-65mm) save space, thus securing a larger installation area.
- SV setting: 3 point
- PID Value: 3 types
- 2-output heating and cooling control available
- Total 32 steps Program available (optional) (1-4 pattern, 32-8 step)
- RS-485 Interface available (optional) (Master - slave function, Modbus/Shimaden Protocol)
- Heater break/heater loop alarm: Single/ 3-phase available
- A wide selection of additional functions (optional) is available to suit various needs.

SMALLER INSTRUMENT DEPTHS Series SRS11/13/14

Smaller instrument depths save space and secure a larger and flexible installation area.

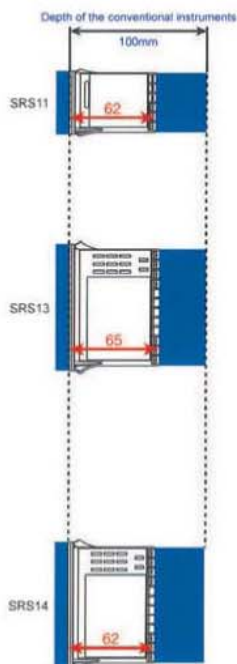

SRS11 Series
(48x48)

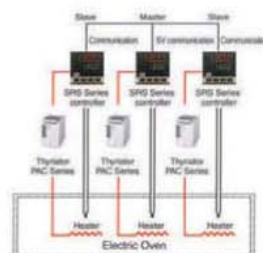

SRS13 Series
(96x96)

SRS14 Series
(48x96)

EXAMPLE OF TUNNEL FURNACE PROGRAM TEMPERATURE CONTROL

From The Editor's Desk

The world economic outlook is showing signs of recovery and progress. Our manufacturing sector has recovered considerably and we look forward to the increase in government projects in the stimulus packages.

We have come to the last quarter of the year and it will be a good time for us to plan for the year 2010. It is hoped that you will assist the association in the matter of Membership Recruitment. Although we have positive growth each year but the quantum is not up to our expectation. We hope to achieve a 5% annual growth in membership. Your efforts in getting those associated with the business to be our members will be highly appreciated. We think you will be the best person to introduce TEEAM and the benefits of becoming a member.

We had been commended for hosting the AFEEC and FAPECA Conference and Meeting at Kuala Lumpur Convention Centre for 2009. All foreign delegates were pleased with our hospitality and they felt most welcomed. The conference was also well attended and overall it had been a successful event for TEEAM. The credit goes to all organising committee members, staff and our valuable sponsors for the prestigious conference and meeting of AFEEC and FAPECA 2009.

The planning of the Tenth Malaysia Plan is in the initial stage and we are expected to provide inputs to many forums by the various ministries. It will be good if you can forward your suggestions to TEEAM.

Our heartfelt condolence goes to the family of the late, Dato' Ir Pian Sukro, Chairman of Energy Commission on his sudden passing away on 31st October 2009. We acknowledged his contribution to the Energy and Electricity sector of Malaysia.

Regards,

Ir Chew Shee Fuee

AFEEC/FAPECA Conference & Meeting 2009

TEEAM was honoured to host the 2009 Conference & Meeting of the Asean Federation of Electrical Engineering Contractors (AFEEC) and Federation of Asian Pacific Electrical Contractors Associations (FAPECA). The event was held from 15th to 17th July 2009 at Kuala Lumpur Convention Centre in conjunction with the Asean Elenex 2009 Electrical Engineering Exhibition.

The conference and meeting attracted over 200 electrical contractors and suppliers from AFEEC and FAPECA member countries from Australia, Hong Kong, Indonesia, Korea, Malaysia, Philippines, Singapore, Taiwan and Thailand. The objective was to promote the general interests of electrical installation and contracting and related industries on a world wide basis. This gathering provided opportunities for the exchange of ideas and information among members and to encourage business networking between national or regional associations as well as between individuals.

National associations that participated are Association of Indonesian Electrical and Mechanical Contractors (AKLI), Hong Kong Electrical Contractors' Association (HKECA), Korea Electrical Contractors Association (KECA), National Electrical and Communications Association, Australia (NECA Australia), Singapore Electrical Contractors and Licensed Electrical Workers Association (SECA), Society of Philippine Electrical Contractors & Suppliers (SPECS), Taiwan Electrical Contractors Association (TECA), Thai Electrical & Mechanical Contractors Association (TEMCA) and TEEAM.

At the conference opening – (seated from left) Mr Sopon Laosuwan (AFEEC President), Mr Suresh Kumar Gorasia (TEEAM Past President cum Conference Organising Chairman), YBhg Datuk Ir Hamzah Hasan (Chief Executive of Construction Industry Development Board Malaysia), Engr Fu Wing Hoong (TEEAM President) and Mr George Ko (FAPECA Secretary General).

Conference on July 15th

The theme for the conference was “Green Opportunities in the Face of Credit Crunch”. It was a great platform to explore the areas of energy efficiency and renewable energy, and also providing solution for addressing the issue of global warming. YBhg Datuk Ir Hamzah Hasan (Chief Executive of Construction Industry Development Board Malaysia) officiated the conference opening. The following interesting papers were presented at the conference:

- **“Malaysia’s Achievement in Energy Efficiency & Renewable Energy and Government Future Plans”** by Ir Ahmad Fauzi Hasan, Chief Operating Officer of Energy Commission, Malaysia (ST).
- **“Renewable Energy Development in Indonesia”** by Mr Moeljadi Oetji, Senior Adviser of Association of Indonesian Electrical and Mechanical Contractors (AKLI).

Officiating conference opening - YBhg Datuk Ir Hamzah Hasan (Chief Executive of Construction Industry Development Board Malaysia) striking the gong. Looking on (from left) are Mr Sopon Laosuwan (AFEEC President), Mr Suresh Kumar Gorasia (TEEAM Past President cum Conference Organising Chairman), Engr Fu Wing Hoong (TEEAM President) and Mr George Ko (FAPECA Secretary General).

At the opening of Asean Elenex 2009 – (from left) YBhg Tan Sri Datuk Amar Leo Moggie (TNB Chairman), Engr Fu Wing Hoong (TEEAM President), the Late, YBhg Dato’ Ir Pian Sukro (former ST Chairman), Ir Chew Shee Fuee (TEEAM Vice President), Mr Suresh Kumar Gorasia (TEEAM Past President cum Conference Organising Chairman) and Mr Jack Soon Lee Hock (TEEAM Assistant Honorary Secretary).

Special thanks to conference session Chairmen, YBhg Datuk Ir (Dr) Mohd Annas Mohd Nor (Chairman of Malaysia Electrotechnical National Committee, MyENC cum TEEAM Technical Adviser) and Ir Rocky Wong Hon Thang (TEEAM Honorary Fellow cum Technical Adviser).

Asean Elenex Exhibition

The 8th international exhibition of transmission & distribution and electrical engineering for the Asean region, Asean Elenex 2009 was held from 15th to 18th July 2009 at Kuala Lumpur Convention Centre. It showcased the latest technology and products of 600 companies from over 30 countries, including national pavilions from China, India, Singapore, South Korea and UK. It attracted over 6,000 trade visitors from over 40 countries, comprising foreign and local entrepreneurs who are expected to establish networks and collaborations.

The four-day exhibition provided an excellent platform for both visitors and exhibitors to exchange knowledge and to look out for improved solutions that are being adopted by some of the leading names in the electrical engineering industry worldwide. The

exhibition is fully supported by the Ministry of Energy, Green Technology and Water, Energy Commission, Tenaga Nasional Berhad, Malaysia External Trade Development Corporation, FAPECA, AFEEC and TEEAM.

AFEEC Council Meeting

On July 16th, AFEEC held its 47th AFEEC Council Meeting. The Federation will continue to pursue an Asean Mutual Recognition Agreement for Electrical Engineering Works (E2WMRA) through the governments of the ASEAN member countries and also the support of the ASEAN Secretariat.

FAPECA Board Meeting

Representatives from FAPECA member countries attended the 23rd Board Meeting later in the afternoon of July 16th. SECA took the opportunity to deliver a presentation on “New Development in Power Quality Management”. The meeting provided opportunities to participate in open discussions and updates on current issues. AFEEC will take over the FAPECA Presidency for the term 2009/2010. Mr Sapon Laosuwan is the FAPECA President for the new term.

Technical Visit

Delegates had the opportunity to visit the Kuala Lumpur SMART Tunnel on July 17th. They were briefed on the concept and operation aspects of the tunnel. From the viewing gallery, delegates observed how the SMART personnel monitor the traffic flow at the tunnel. It was an interesting visit and an eye opener for all.

Friendly Golf

Those who did not participate in the technical visit, had a round of friendly golf game. They tested the green at Tropicana Golf & Country Club. It was an excellent networking event for the golfers.

FAPECA delegates – (seated from left) Leaders: Mr Lau Chun-Kay (HKECA Life President), Engr Nicholas C Balderrama (SPECS Executive Vice President), Mr Moeljadi Oetji (AKLI Senior Adviser), Mr Liao Chung-Nan (TECA President), Mr William Chan, JP (HKECA President), Mr Sapon Laosuwan (AFEEC President), Mr Chen Pi-Che (FAPECA President), Mr George Ko (FAPECA Secretary General), Mr YJun Yun Su (KECA Chairman of oversea Committee), Mr Adang Surachman (AKLI President) and Engr Fu Wing Hoong (TEEAM President).

Throw away the feeling of unprotected on electrical apparatuses, right now! Upon your selection of CHINT products, security and reliability is always alongside with you.

As an oriental leader in the electrical industry, CHINT takes and sustains its leading position over its peers on more than 20 years, experience specialized in electrical apparatus manufacturing.

Facilitated with automatic product line, exquisite testing machines and the top testing center, the quality is guaranteed. Because we know the high product quality is where you place your trust.

The last but not least, here, low-cost due to large-scale production make your selection more effective.

Conference on “Green Opportunities in the Face of Credit Crunch”

Abstract of speech by TEEAM President, Engr Fu Wing Hoong at the Opening of the Conference which was held on 15th July 2009 at Kuala Lumpur Convention Centre.

A very good morning.

TEEAM together with AFEEC and FAPECA are glad to host this international conference on “Green Opportunities in the Face of Credit Crunch”.

Today’s event is part of an important cross-border activities of TEEAM, AFEEC and FAPECA to collaborate, exchange views, mutual recognising and networking to promote solidarity and to help the electrical industry move forward.

Before I go further, allow me to introduce AFEEC and FAPECA for the benefit of those who might wonder what they mean.

AFEEC stands for ASEAN Federation of Electrical Engineering Contractors. It was formed in 1979 by five ASEAN electrical industry associations from Indonesia, Philippines, Malaysia, Singapore and Thailand which represent a good cross-section of the various entities in their respective countries in the Asean region engaging in the electrical engineering and contracting business.

Whereas FAPECA stands for Federation of Asian Pacific Electrical Contractors Associations which was founded in 1986. FAPECA’s membership encompasses a much larger geographical location over the whole of Asian & Pacific whose members comprise the electrical contracting associations from countries such as Korea, Taiwan, Hong Kong, Japan, Australia, New Zealand, USA, Mexico and ASEAN through AFEEC.

The topic today is timely and it is hoped that it can help stimulate your minds to search for opportunities at this time of credit crunch. The word “green” is always loosely defined and is a word commonly used to represent “environment friendly”. Here today “green” to me basically points to anything that will help in sustainable development or will help sustain and heal our mother earth, with a focus on energy, particularly those related to our electrical industry.

While the Asian financial crises which hit us in the mid 1997 were said to be caused by the unsustainable development in our region, the unsustainable American Housing Industry was the cause of the recent American financial crises which immediately manifest itself into a world wide credit crunch situation. The world suddenly find themselves short of fund to roll over and many businesses are caught short of cash and are forced into liquidation and even some national economy like Iceland share the same predicament.

Before the collapse of the commodity market, commodity prices were surging like never before and were recording new heights. The reason given was also “unsustainable” development which resulted in scarcity of resources thereby pushing up prices.

All of us know that our mother earth today is in pain and the main reason is the rate at which human exploits the earth. Our mother earth cannot heal herself fast enough. If nothing is done, the consequence is human race will suffer through earth’s collapse which may hit us through natural disasters such as earth quakes, Tsunamis, floods, disease, fire and may be even sudden sinking of huge land mass.

The keyword here is “sustainable” and it is important to have sustainable development failing which our future generation might have to bear the consequences.

I believe the recent chain of events and the credit crunch crisis had awakened some nations and reminded them of the need to act immediately to the call for sustainable development and take immediate action and green energy initiative is an important step forward.

Look at America for example, under the Obama’s administration, there is a big budget for green energy initiative which American Newspaper had reported to the tune of USD15 billion. Back home in Malaysia, our Malaysian government had taken a big step towards supporting green technology initiative and even named one ministry under a new portfolio called “Energy, Green Technology and Water”.

I hope our Malaysian government will continue to increase initiative to push through and play the lead role as the biggest consumer of green technology as we drive towards industrialisation.

Even our private sector, PAM & ACEM had recently launched a Standard for Green Building Index. I congratulate them and believe such initiative will benefit mankind.

Green energy is not a recent technology. It had been around for a long time. If we look around we can find many green technologies, green standards, and a good range of green equipment and products which support the implementation of green projects. The unique feature of all green technologies and green energy products are somehow always linked to high quality, high energy efficiency and is environment friendly.

Thanks must be given to the more advanced countries whose government had the foresight to see through the future and keep nursing the green technology till today. Unfortunately the initial costs of these green technologies still do not come cheap even though it had dropped considerably. The higher cost is still a big deterrence to the market place.

As the world population becomes more aware of the need to have a sustainable development to save our earth through less wastage and more efficient usages of the earth’s resources, the demand for green technology and its related equipment will definitely increase and will create many new business opportunities.

However, due to the high cost of initial investment of green technology today, it is much more difficult for the private sector alone to drive it. This is simply because private sector project cost study may not encompass social impact cost.

Scientists have long ago insisted that the unsustainable development could be one of the main causes of global warming and natural catastrophes. Whenever a natural disaster occurs it causes us huge loss and the government must find ways to prevent such losses.

The government which is responsible for the overall social issues must ensure their social responsibility is taken care of. It will be much cheaper and economical for government to enforce green technology to support sustainable development. It is appropriate that government must be the prime mover of green technology initiative and help to move the private sector towards the right direction in green technology development.

There is no doubt that green energy will be an industry to watch in the near future and I hope all trade associations, NGOs, industrialists and all of us should continue to engage their respective government on the importance to initiate sustainable development through promoting and building green energy development for the sake of our next generation.

The conference today may present some very useful insights into green energy and its opportunities. We have some very good papers here today and I hope some of the papers may stimulate your minds into finding green opportunities.

Thank You.

8th ACCSQ JSC EEE Meeting in Malaysia

On 11th November 2009, the 8th Meeting of Asean Consultative Committee on Standards and Quality (ACCSQ) Joint Sectoral Committee of Electrical and Electronic Equipment (JSC EEE) was officiated by Ir Ahmad Fauzi Hasan (Chief Operating Officer of Energy Commission, Malaysia) at Renaissance Kuala Lumpur Hotel, Kuala Lumpur. Ir Chew Shee Fuee (Vice President) and Ir Rocky Wong Hon Thang (Honorary Fellow cum Technical Adviser) represented TEEAM at the opening ceremony.

The objectives of JSC of EEE were to facilitate and minimising problems on trade barriers to EEE and to enhance trades of EEE within and outside of ASEAN. The 2-day meeting was attended by delegates from Indonesia, Vietnam, Singapore, Brunei, Philippines, Cambodia, Lao PDR, Myanmar and Malaysia. Representatives from the ASEAN Secretariat were also in attendance. TEEAM's representative, Ir Rocky Wong Hon Thang was a member of the Malaysian delegation at the meeting.

Representatives from Malaysia – (2nd row from right) Ir Rocky Wong Hon Thang (TEEAM Honorary Fellow cum Technical Adviser) was a member of the Malaysian delegation.

Opening ceremony – (left) Ir Ahmad Fauzi Hasan (COO of Energy Commission, Malaysia) delivering his opening speech at the ACCSQ JSC EEE meeting. Looking on are (centre) Dr Arief Adang (Chairman of JSC EEE) and Ir Amir Hassan (Co-Chairman of JSC EEE).

The meeting is held twice or thrice annually to keep members abreast on the latest development in ASEAN Economic Integration, ASEAN Charter, ASEAN Economic Community, ASEAN trade in goods agreements and harmonisation of EEE regulatory regimes. Besides, it is a platform to exchange information on technical regulations, update on the listing of Conformity Assessment Body (CAB) under the ASEAN EE MRA (Mutual Recognition Agreement), list of IEC standards for harmonisation and guide for determining the type of conformity assessment.

Some outcomes of the workshop handled by ASEAN – Europe United Programme Regional Integration Support Phase II (APRIS II) on ASEAN Harmonisation EEE Regime; ASEAN Harmonised Standard and Conformity Assessment Procedure based on Risk Assessment; and Post Market Surveillance were shared among country members.

Overall it was a fruitful meeting and the delegates were grateful to the host viz the Energy Commission for the warm hospitality in Malaysia.

All smiles – A group photo of all delegates.

Show of support – Guests were invited from the industry to witness the opening of the 8th Meeting of ACCSQ JSC EEE.

Luncheon with TNB (KL)

On 22nd July 2009, Tenaga Nasional Berhad Distribution Division of Kuala Lumpur hosted a luncheon meeting with some TEEAM officials at Tenji Japanese Restaurant located at Solaris, Mont' Kiara. The objective of the event was to foster closer working relationship between TNB and TEEAM.

Ir Kamaliah Abdul Kadir (General Manager of TNB KL) led some TNB senior officials to rapport with TEEAM. Engr Fu Wing Hoong (TEEAM President) recorded the association's thanks and appreciation to TNB for the cordial working relationship.

For the album – A group photo taken after the Japanese buffet lunch.

Souvenir from TNB – (left) Engr Fu Wing Hoong (TEEAM President) receiving a bag of souvenirs from Ir Kamaliah Abdul Kadir (General Manager of TNB, KL).

Happy gathering – The luncheon meeting has become an annual event between TNB (KL) and TEEAM.

Members-Get-Members Programme

By Membership Recruitment Sub-Committee Chairman, Ir Chang Yew Cheong.

On behalf of the TEEAM Membership Recruitment Sub-Committee, I would like to share some of the benefits as a TEEAM member and some of the success stories.

TEEAM is officially represented in the various relevant government bodies' councils and committees, aim to help members to solve common business problems concerning with regulations, approvals and standards. One of the cases was TEEAM had successfully helped a Construction Member to recover his refundable tender deposit which had been outstanding for a few years. The tender for the project was subsequently shelved and the deposit was not refunded by the Consultant. With the influence of TEEAM, the Association brought the matter to the Board of Engineers Malaysia (BEM) and the deposit was subsequently refunded.

Another case was TEEAM had also successfully helped a member to get back their

product sample. The company participated in a tender for the supply of GSM modem but was unsuccessful in the tender. The member approached TEEAM when they could not retrieve their sample. TEEAM then took up the issue with the tender management company. The product sample was subsequently returned. TEEAM is glad to be able to offer our assistance and we will always look into the needs and problems of our members.

These are some of the cases of TEEAM's assistance given to our members. TEEAM has more than 1,600 members in Malaysia and hence we have stronger voice to raise when our members are facing common problems in their businesses due to government regulations or policy issue. With the strong connection of TEEAM and a large membership database, we are creating a platform for our members to venture their business, to know who are their suppliers in

Malaysia, or look for new potential customers from the TEEAM database.

In the effort to increase the membership of TEEAM, the Council has endorsed a membership recruitment campaign that a member introducing a company member will entitle for two points, while introducing individual members will entitle for one point. The points could be accumulated and used to redeem free advertisement in the SUARA TEEAM and/or redeem one year membership subscription.

We are inviting you and your friends/suppliers/customers to our Fellowship Night to enjoy the gathering and to build up your network with other members. Most importantly invite them to join as a member of TEEAM and for yourself to earn the points for the free advertisement or redeem the membership subscription for the subsequent year.

Academic Excellence / Vocational Training Awards & Book Prizes 2009

Syabas to the winners of the prestigious TEEAM academic excellence awards for their outstanding performance in the 2008 public examinations. The awards presentation was held on 5th September 2009 at TEEAM.

The newly elected Chairman of the Academic Excellence Awards Committee, Engr Leong Kam Seng congratulated all award recipients and thanked their parents for their presence to witness the ceremony. He encouraged recipients to pursue their study in the electrical and electronics engineering field. It is a field that is demanding, challenging and at the same time rewarding and fulfilling. There are many individuals from this field who become very successful businessmen or professional engineers.

This year, the number of academic excellence awards given is six recipients for UPSR category, eleven recipients for PMR category and five recipients for SPM category. Besides, ten book prizes are awarded to best electrical, electronics and mechatronics engineering undergraduates from University of Malaya and University of Science Malaysia. Best trainee awards for the building wiring installer (BWI) course are also awarded to two recipients.

TEEAM President, Engr Fu Wing Hoong was present to give away the awards. He expressed that our industry is facing many challenges and one of the issues of great concern is electrical safety. Hence, a press conference on instant water heater and air-conditioner safety was arranged. TEEAM supports the government's effort in promoting proper wiring installation and the application of correct copper cables which must be carried out by competent persons. TEEAM hopes to create safety awareness to the public and also constantly remind our members. Ir Ahmad Fauzi Hasan, Chief Operating Officer of the Energy Commission was invited to witness the ceremony and to share his views on electrical safety at the press conference.

One of the UPSR recipients, Chin Zhen Yang said that his success factor is to study hard and manage his time smartly. His favourite hobbies are reading and drawing. He hopes to be a doctor.

High achievers – A group photograph of all awards and book prizes recipients with TEEAM officials. ST COO, Ir Ahmad Fauzi Hasan (seated 6th from left) was present to witness the ceremony.

Well done! – A group photograph of BWI trainees with TEEAM officials and ST COO, Ir Ahmad Fauzi Hasan.

Lai Pheinee, a PMR recipient said that she does a lot of preparation before examination. She reads a lot of reference books and studies at least two hours every day. She hopes to study in the field of mass communication and she aspires to become a broadcaster. She loves music, reading, playing badminton and also swimming.

SPM recipient, Nabilah Mohd Yaakob attributed her success to being focused in class and frequent interaction with her teachers. She is always active in extra co-curricular activities in school. One of her favourite hobbies is surfing the internet. Her ambition is to become a dentist and she hopes to further her study in the Middle East.

Book prize recipient, Desmond Chow Ming Chia of University of Malaya believes hard work, determination and having a focus mind are his "secret" to success. His good results come from good time management, good

understanding and observation skills. He hopes to be an engineer and excel as a technology pioneer. His favourite hobby is playing piano.

Another book prize recipient, Ang Cheng Cheng of University of Malaya said that the keys to achieving good results are good time management, study smart and hard, and also concentrate during lectures. Her ambition is to become an engineer. She loves sports like tennis, badminton and softball.

Lim Wei Hong, a book prize undergraduate from University of Science Malaysia believes there is no shortcut in achieving any success. He always searches for knowledge and aims to achieve a PhD. He aspires to become a lecturer to share his knowledge and experience with the future generation.

Group photograph and light refreshment capped off the event.

Stamp Duty Order

Through the Treasury Announcement dated 9th September 2009, the Honourable Minister of Finance had agreed, in accordance to his purview under Section 80 (2) of the Stamp Act 1949 that the stamp duty to be imposed on service agreement is at a flat rate of RM 50.00 per agreement during the period of from September 2009 to 31st December 2010. To implement this order, the government has gazetted the Stamp Duty Order (Remittance) 2009 / P.U. (A) 391/2009.

With this gazette, service agreements signed between 15th September 2009 to 31st December 2010 can be stamped at any Inland Revenue Board Stamp Duty Office at a

flat rate of RM 50.00 per agreement without having to obtain approval letter from the Ministry of Finance.

Effective 1st January 2011, ad valorem stamp duty will be imposed at a rate of RM 5.00 per RM 1,000.00 service agreement value. In order to keep the cost of stamp duty to a minimum, companies are advised to break down the percentage of materials cost and services cost. Ad valorem stamp duty is only imposed on the services portion of the agreement. These announcements can be accessed at Treasury website www.treasury.gov.my.

POWERWELL

Safety • Reliability • Quality

At **POWERWELL**, we possess the necessary technical know-how to meet today's demand in electrical switchboards solutions. We upgrade ourselves continuously and re-invest in the latest available technology and machineries in the market.

This is in line with our aspiration to become a world class manufacturer of electrical switchboard where we trust in providing safe, reliable and quality power supply and services for our valued customers.

Golf Competition 2009

On the morning of 1st October 2009, TEEAM organised an annual golf competition at Kelab Golf Sultan Abdul Aziz Shah (KGSAAS). The response was tremendous with 160 golfers taking part. The weather was excellent and the competition was smoothly organised with half-way drinks sponsored by Fuji Electric FA (Asia). It was a good networking event for members and their guests. The list of winners and sponsors appears on page 35 & 37.

Collecting score cards – Golfers arriving in the early morning for registration.

At half-way stop – Golfers posing with some Fuji bon-bon girls.

Perfect posture – A good swing by one of the golfers.

Before tee-off – Golfers assembled for final announcement.

TEEAM President delivering his speech – Engr Fu Wing Hoong appealed for TEEAM members' active participation in upcoming events.

Building Wiring Installer Course

Introduction

The Building Wiring Installer training programme is designed for the construction personnel involved in the low voltage installation of electrical wiring and related electrical equipment. It is also a skill standard developed by the Construction Industry Development Board (CIDB) with participation of industrial experts from the public and private sectors. The course is sponsored by CIDB subject to prior approval.

Course Duration & Language

Training lessons are conducted in Bahasa Malaysia from Monday to Friday, 10:00 am to 5:00 pm, over a period of 3 months.

Course Content

1. Fundamentals of electricity
2. Wiring cables
3. Protective devices

4. Read and interpret drawings
5. Electrical wiring
6. Installing electrical equipment and appliances
7. Use measuring and testing instrument
8. Practical safety measures
