*YAB Dato' Sri
Mohd Najib Tun Abdul Razak*

Message From Prime Minister of Malaysia

I am delighted to pen a few words in this Souvenir Programme Book to commemorate the 60th Anniversary of The Electrical and Electronics Association of Malaysia (TEEAM).

I was made to understand that TEEAM, which was established in 1952, is now standing tall with over 1,700 members who are engaged in the E & E engineering construction & services, trading and manufacturing activities.

TEEAM is known to be active in representing the interest of the industry both in the government and the private sector's national and international forums. Here, I wish to congratulate TEEAM for successfully bringing together the E & E contractors, installers, services & maintenance personnel, manufacturers and traders under one umbrella to achieve your objectives.

As many are aware, the Economic Transformation Programme formulated by the government is committed to transform Malaysia to a high income developed nation by 2020. Many of you are playing a direct part in this transformation plan, and I hope all of you have benefitted or will be benefitted from it. TEEAM has a vital role in the E & E industry in progressing with the government in achieving our common goals. With your committed support, I am sure we will be fully on track to be there.

I wish TEEAM the very best in its future endeavors and its continued glorious journey in nation building.

Thank you.

Dato' Sri Mohd Najib Tun Abdul Razak

YB Dato' Sri Peter Chin Fah Kui

Message From
Minister of Energy,
Green Technology and Water,
Malaysia

I am pleased to write a message in this Souvenir Programme Book, published in conjunction with The Electrical and Electronics Association of Malaysia (TEEAM) Diamond Jubilee Celebration. I wish to take this opportunity to congratulate TEEAM on attaining its 60th birthday.

60 years is a long history for TEEAM. Over the years, the association had grown from strength to strength. Under the guidance of its dynamic leaders, TEEAM is moving forward fostering greater support and participation in government's policy formulation, regulations and standards development. I am pleased to note that TEEAM organises training courses for the enhancement of technical knowledge and skill of the younger generation which is in line with the government's economic transformation programme to beef up a skilled labour force to support the nation's growth.

Energy is the key impetus to any economic activity and the government has intensified efforts in promoting energy efficiency (EE) and renewable energy (RE). The implementation of EE programmes focused on energy-saving features in the industrial and commercial sectors such as efficient lighting & air-conditioning system and energy management system. Additionally, the government promotes the utilisation of RE resources such as solar, wind, hydro, bio-fuel using palm oil waste and energy from municipal waste. The government is presently drawing up energy efficiency and conservation law to promote efficient usage of energy in the industrial and commercial sector as well as among the general public.

In order for us to ensure that efficient energy management target is achieved at all levels, there must be greater understanding, support and co-operation from government, industries, companies and individuals. In this aspect, I would like to commend TEEAM for taking the initiative to enhance industry players' understanding and knowledge on the importance of energy efficiency in the current challenging environment. This will ensure that the EE programmes initiated for the benefit of the industrial sector and the nation as a whole in the proposed EE Master Plan could be realised.

My heartiest congratulations to TEEAM once again, for a successful Diamond Jubilee celebration.

Dato' Sri Peter Chin Fah Kui

*YBhg Tan Sri Datuk
Dr Ahmad Tajuddin Ali*

Message From

**Chairman of Energy Commission,
Malaysia**

On behalf of the Energy Commission, I wish to extend my heartiest congratulations to The Electrical and Electronics Association of Malaysia (TEEAM) on your Diamond Jubilee Celebration this year. This is indeed a significant milestone for TEEAM having achieved 60 years of service to its members, to the industry and to the country.

With the nation's growth set to increase through the many policies and economic transformation programmes, the electricity supply industry will play a crucial role in providing the infrastructure for the country's continued development. Hence, it is important that we must ensure not only sufficient and reliable supply of electricity but also its safe and efficient utilisation. Enhancing innovation and ensuring the resilience of the electricity supply industry is a challenge that we face as we progress to achieve a developed nation by 2020. In this respect, TEEAM is an important body to work hand in hand with the Commission in building our capacity to meet these challenges.

With these few words, I wish TEEAM members continued success in many more years to come and we at the Energy Commission look forward to closer collaboration with TEEAM in tackling issues and challenges ahead.

Tan Sri Datuk Dr Ahmad Tajuddin Ali

Engr Fu Wing Hoong

Message from TEEAM President

60 years is a significant milestone for TEEAM. From a humble beginning in the 50s, TEEAM has over the years established a good rapport and reputation and is now well recognised by the government and private sectors. TEEAM is consulted when the government formulates regulations and policies. I am proud to note that we now have a better standing in voicing industry's concerns over some key policy matters.

TEEAM has participated in the steering committee to contribute inputs in the formulation of the Construction Industry Payment Adjudication Act (CIPAA) 2012 which was gazetted on 22nd June 2012 recently. The Act provides alternative dispute resolutions to arbitration and litigation which are time consuming and often expensive. CIPAA will also ensure timely payment for the benefit of our members, which will be a great relief for the electrical construction industry. Towards this end, TEEAM appreciates CIDB's effort in driving the CIPAA to be gazetted.

TEEAM is facilitating the Department of Skill Development in the development of the National Occupational Skills Standard (NOSS) which will be used as reference document for the development of skill training modules to upgrade the skill of workers. Members may voice to the association on the NOSS needed to be developed where skills are lacking.

We are also participating actively in the Ministry of Energy, Green Technology and Water's work groups in drafting the Energy Efficiency & Conservation Law. The Law requires us to be more efficient when using energy and practise energy conservation which will lead to a greener Malaysia and a healthier environment.

As an NGO which is concerned about environmental issue, TEEAM is participating in an energy saving compact fluorescent light (CFL) recycling project. Mercury is a very harmful substance and used CFL bulbs are collected for proper disposal. The public will be given incentive for returning the used CFL bulbs for recycling. This might not be the best way to dispose them for now but at least it is a good start.

To better reflect the changing times, TEEAM has also updated its Constitution. In this respect, the incorporation of the Honorary Fellow membership is meant to help promote and advance TEEAM's agenda by drawing the expertise of industry experts of good standing. The formalisation of EXCO members' roles and responsibilities is done to complement the work of the Council. This will be a very important decision making body that helps to make day-to-day decisions on association matters for greater efficiency.

Last but not least, I wish to express my appreciation to the Diamond Jubilee Dinner Organising Committee for their wonderful effort in making this dinner a success and so memorable. My heartiest thanks must also go to our dinner sponsors for their generous contribution and ardent support. To our distinguished guests, members, friends, associates and well-wishers, a big thank you for your presence and greetings.

Thank you.

Engr Fu Wing Hoong

Ir Steven Ng Khoon Hwa

**Message from
Organising Chairman
TEEAM Diamond Jubilee Dinner**

On behalf of the Dinner Organising Committee, I wish to extend our gratitude to our Guest of Honour, YB Dato' Sri Peter Chin Fah Kui, Minister of Energy, Green Technology and Water, Malaysia for gracing our Diamond Jubilee Dinner Celebration tonight.

As the Organising Chairman of this auspicious TEEAM Diamond Jubilee Dinner, I am indeed honoured to be entrusted the role to organise this important event and make it a memorable one in the history of TEEAM.

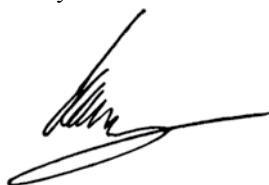

I wish to welcome our distinguished guests, heads of government departments, leaders of professional bodies, state association leaders, sponsors and friends to this auspicious dinner. My special appreciation also goes to our overseas guests who come from Thailand and Singapore.

To the many generous sponsors, donors and supporters of this occasion, I must acknowledge and thank them for their strong support and encouragement towards making this 60th Anniversary a success. The number of dinner tables taken up is very encouraging despite the current soft economy.

I must also highlight my sincere appreciation to our President, the Council and Members for their strong support and not to forget my dedicated Organising Committee for their hard work in making this dinner a memorable and successful one. To the Fund Raising Sub-Committee, thanks a million for making tireless effort to raise funds for our TEEAM Building Fund. Last but not least, my gratitude to the Publication Committee for publishing this Souvenir Programme Book which captures the significant events in the history of TEEAM.

I wish everyone an enjoyable and memorable dinner. Please enjoy the entertainment, food and drinks we have arranged tonight.

Thank you.

Background

The Electrical and Electronics Association of Malaysia (TEEAM) is a representative body of the electrical and electronics industries in Malaysia. TEEAM was established in 1952 and it aims to work closely with all government departments, statutory bodies and the private sector to ensure and promote orderly growth and development of the electrical and electronics industries.

TEEAM is officially represented in the various relevant government bodies' Council and Committees such as the Ministry of Energy, Green Technology and Water (KeTTHA), Department of Skills Development (DSD), Energy Commission (EC), Construction Industry Development Board (CIDB), Standards Malaysia and SIRIM Berhad. TEEAM is an appointed Standards Wiring Organisation (SWO) for electrical and electronics products/services. Besides, TEEAM is also represented in the Asean Consultative Committee for Standards & Quality (ACCSQ) Joint Sectoral Committee on Electrical & Electronics Equipment (JSC EEE).

TEEAM is accredited by CIDB to conduct building wiring installer training course. TEEAM has international affiliation through its membership in the Asean Federation of Electrical Engineering Contractors (AFEEC). In a broader spectrum, TEEAM is also affiliated to the Federation of Asia-Pacific Electrical Contractors Associations (FAPECA) through AFEEC's membership in FAPECA.

Membership

Membership of TEEAM is drawn from companies, individuals as well as state associations engaged in the electrical and electronics industries in Peninsular and East Malaysia. To date, TEEAM has approximately 1,720 members and they are classified according to their business activities, i.e. Engineering Construction and Services, Trading and Manufacturing.

Manufacturing General Meeting on 8th May 2011.

Construction & Services General Meeting on 8th May 2011.

Trading Committee Meeting on 26th March 2012.

Courtesy visit to the Minister of Housing and Local Government, YB Dato' Chor Chee Heung on 18th April 2012.

AFEEC Council Meeting in Hong Kong on 5th June 2012.

Technical visit to Malaysian Newsprint Industries on 16th June 2012.

On 30th May 2012, TET Turkey sealed an MOU with TEEAM to promote business cooperation between members of TET and TEEAM.

Aims & Objectives of TEEAM

- To promote and co-ordinate throughout the country the development of the electrical and electronics trade, industry and services by members of TEEAM with a view to contributing effectively to the economic development of the country.
- To promote measures aimed at securing improvements pertaining to techniques, procedures and methods in the electrical and electronics trade, industry and services.
- To identify and study problems arising in the electrical and electronics trade, industry and services and to discuss these problems with, and/or bring them to attention of:
 - Government and Quasi-Government Agencies, through the relevant Ministries, Departments and Agencies.
 - Architects, engineers, quantity surveyors and/or other consultants through their relevant institutions or associations.
- To promote the legitimate interest of members, in particular to discuss and negotiate with government departments and agencies, institutions and other consultants on matters pertaining to policy, finance, legislation, technical standards, administration of contracts and procedure of registration which affect the electrical and electronics trade, industry and services.
- To seek representation on committees/councils/boards set up by government or non-government organisations concerning the electrical and electronics trade, industry and services.
- To encourage and promote the practice of professionalism in the electrical and electronics trade, industry and services by the members of TEEAM.
- To encourage and participate in educational programmes relevant to the electrical and electronics trade, industry and services.
- To organise and manage seminars, symposiums and conferences for the dissemination of knowledge, directly or indirectly connected with the electrical and electronics trade, industry and services and to promote fellowship amongst such firms / persons.
- To seek and maintain affiliation with other organisations or associations, where such affiliation is consistent with the overall objectives of TEEAM.
- To collect, collate and disseminate statistical and other information relating to electrical and electronics trade, industry and services.

Past Presidents of TEEAM

A salute to our Past Presidents for their dedications, tireless efforts, commitments and great contributions in serving our association and making TEEAM a reputable and well recognised trade association.

Words of Past & Present Presidents of TEEAM

Mr Suresh Kumar J Gorasia (Term: 1993-1995) In line with the government's call for racial harmony in the 70's, I was invited by Mr Lim Yok Kee in 1983 to join this esteemed organisation to reflect its status as a multiracial NGO. The formation of the Federal Territory led to the change of our organisation to Selangor and Federal Territory Electrical Association. I became the first non-Chinese President in 1993. During my term, TEEAM members participated in an international electrical trade exhibition which was graced by the former PM Tun Dr Mahathir Mohamad.

YB Dato' Ir Donald Lim Siang Chai (Term: 1995-2001) I joined The Electrical and Electronics Association of Malaysia, TEEAM, in the year 1983 when Dr K K Lim was President, noticing that the association had transformed itself from previously just a recreational club to a professional body. At the moment, the Ministry of Finance also invites TEEAM to present their views of the industry, so as to help the country in our economic transformation and enhance our economy in the country.

Ir Chew Shee Fuee (Term: 2001-2005) Our association is broadly divided into 3 groups: Engineering Construction and Service, Trading, and Manufacturing. Mr Lim Yok Kee, President of the association in 1987, was instrumental in consolidating the associations in various states into one national association.

Dato' Ir Lee Peng Joo (Term: 2005-2009) TEEAM is also member to both ASEAN and Asia Pacific trade organisations since 1973. In 1988, Ir G H Liew was the first Malaysian to become President of AFEEC. During my term, I initiated the implementation of reorganising AFEEC activities making it relevant to our changing times.

Engr Fu Wing Hoong (Term: 2009-Current) TEEAM celebrates its 60 years of transformation. Our Past President, the late Mr Toh Kek Yam's immense contribution at the helm for 20 years had set the bar for Past Presidents like Dr K K Lim, Mr Lim Yok Kee and Ir G H Liew who continued to transform the association to what it is today. May the light in the association lead the E&E industries towards a brighter and greener mother earth.

60 Years of TEEAM

1952 – Development of the Association

In 1952, the Selangor Electrical Engineering Association (SEEA) was established. With the end of the Second World War and the liberation of Malaya, the electrical trade grew and prospered with increasing demands for electrical goods. At that juncture a growing number of far-sighted traders in the electrical sector advocated the formation of an association. The purpose of forming an association was to promote unity in this sector and to look after their welfare. With the fast advancement of the electrical sector, it was felt that no progress would be possible without fostering closer ties and the exchange of ideas among the fellow traders and contractors.

The evening of 25th July 1952 witnessed a get-together among electrical suppliers and contractors held at the premises of the Commercial Employees Guild. It was on the initiative of Messrs. Phang Wai Ng, J.P., Hooi Fook Sing, Lum Choon, Chan Kit Cheong and many others who met to start an association. At this meeting, a Pro tem Committee of 31 members was formed and the late Mr. Lee Hon Cheong was elected the Chairman. The first meeting of the Pro tem Committee was held on 3rd August 1952 to make preparation for the drafting of the constitution and to look for a suitable premises. On 15th September the same year, a meeting of the Pro tem Committee passed a resolution to rent the top floor of the building at No. E-107, Pudu Road, Kuala Lumpur, to serve as the premises for the proposed association. A campaign was launched simultaneously to raise funds and to recruit members. The membership drive was received with overwhelming enthusiasm. On 21st March 1953, the association convened its first Annual General Meeting. The association then registered a membership of 44 members.

The association formation was celebrated with a grand dinner. The jubilation of the participants and their impressive turnout made that evening a very memorable one. The Registrar of Societies approved its registration on 25th September 1953,

Organising committee for the publication of the 1st Commemorative magazine in 1959.

Anniversary celebration dinner on 9th September 1959.

thus giving birth to the Selangor Electrical Engineering Association. Mr Chan Tuck Chee was elected the first President.

1954 – The Association's Premises

On the New Year's Day of 1954, the association's premises was officially launched by the General Manager of the Central Electricity Board (C.E.B.). Present to witness the occasion were senior officers of the C.E.B. and various commercial firms, community leaders, representatives of associations and guilds. From then on, the Selangor Electrical Engineering Association carried out its activities as an official and legal body.

The association grew from strength to strength under the able management of the successive committees. In 1955 with an increase in membership, the association's premises was found inadequate. It also coincided with the expiry of the tenancy. The association then decided to rent a new premises on the 3rd floor of the Lee Clansmen's Association at No. 57, Kampung Dollah Road, Off Pudu Road, Kuala Lumpur. This new premises was spacious enough for members to carry out a wide range of physical recreation and leisure activities after office hours, including a musical band.

1957 – Change of Name

With the attainment of independence of the country in 1957, the association reached new heights with an increase in the recruitment of outstation members. On 1st December that

year, a General Meeting passed a resolution to elevate the association to national level with a set-up called the Federation of Electrical Engineering Association. A 9-man Sub-Committee was elected to look into the registration of the new body. In early 1958, the association was told by the Registrar that the word "Chinese" should be included in the name. Repeated appeals to the Registrar not to include the word "Chinese" yielded no results. The association finally agreed to change its name to The Chinese Electrical Engineering Association, Federation of Malaya. The association's name was subsequently approved in July 1958.

The present association's building.

The association set up five Sub-Committees

to assist in the management of its affairs. These were: Technical Sub-Committee, Welfare Sub-Committee, Recreation Sub-Committee, Sports Sub-Committee and Publication Sub-Committee.

1963 – Our Building Fund

In a special meeting held in July 1963, members supported the idea of having its own premises. A Building Committee was formed with Mr Phang Wai Ng, J.P. as Chairman. He was given the responsibility of raising funds for this project. A fund-raising campaign was launched and it drew instantaneous and generous support from its members. Support also came from outstation non-members. In August that same year, the association acquired a 3-storey shophouse as

the new headquarters, at No. 91, Sungai Besi Road, Kuala Lumpur.

Later, at a General Meeting in 1970, it was resolved that the association needed to look for a bigger new premises. It was necessary due to the expanding membership and the need for more space. The old premises was sold to Messrs. Lee Seng Kwang Electrical (M) Sdn Bhd at a price of \$125,000. A new premises was acquired at a cost of \$170,000. This is our present premises located at No. 5, Jalan Gelugor, Off Jalan Kenanga, 55200 Kuala Lumpur. It was officially opened on 9th September 1973.

That year, the association's rules and regulations were amended. Consideration was given to keep abreast with the government's policy of fostering goodwill and harmony. This new policy of the association allowed people of all races to be members. In line with this, the association reverted back to its former name of the Selangor Electrical Engineering Association (SEEA).

After the formation of the Federal Territory in the 70's, the association once again changed its name. It was called the Selangor and Federal Territory Electrical Association (SAFTEA).

The constitution of the association was amended several times to cater for the expansion of the activities undertaken. One of the changes allows the association to widen its representation and promote unity amongst all races.

1977 – Growing from Strength to Strength

In 1977, the association championed for the rights and interests of its members more vigorously. Several important dialogues and negotiations were held. For example, in 1977, discussions were held with the Deputy Minister of Works and Utilities, Public Works Department and National Electricity Board. The discussions pursued the cancellation of unreasonable regulations and implementations imposed on electrical contractors. From 1978 to 1979, dialogues were held with 9 cable manufacturers in Malaysia, to resolve the problem of non supply of cables by the cable manufacturers to their customers due to bad debts.

Since 1979, the association has contributed its share in regional and international cooperation to the formation and activities of the Asean Federation of Electrical Engineering Contractors (AFEEC). TEEAM together with AKLI Indonesia, SECA Singapore, SPECS Philippines and TEMCA Thailand are the founding members of AFEEC.

In the 80's – Towards Specialisation

A grand dinner was held in September 1980 to commemorate the association's 28th

The 1st golf competition was held on 17th November 1985 at Bentong Golf Club.

Mr Michael Chen Wing Sum, Minister with Special Functions officiating the association's premises on 9th September 1973 at No. 5-B, Jalan Gelugor, Off Jalan Kenanga, Kuala Lumpur.

A grand dinner was organised at the Merlin Hotel to celebrate the association's 28th anniversary in 1980.

Association's musical band in the 70s.

Council meeting in progress chaired by the late Mr Toh Kek Yam in 1964.

PEMA Penang hosted the 1984 AFEEC Conference in Penang.

SAFTEA & TEAM just before merger. SAFTEA's 35th anniversary dinner cum AFEEC farewell dinner on 9th September 1987.

Anniversary. During the celebration, the pioneers who had shouldered all the hardships to establish the association were duly recognised. The association had certainly lived up to its expectation. The achievements of the association were attributed to the wise leadership of previous office bearers and the support and cooperation of its members. The amendment of the constitution of the

association in 1983 was another significant milestone, which established three groups to look into the respective interests and concern of its members in different sectors. From then on, all the members would carry out their activities under these three specialised groups, that is the Electrical Construction & Services Group, the Electrical Trading Group and the Electrical Manufacturing Group.

Wiremen training course was established since 1984. It was aimed at upgrading the knowledge and skills of workers.

Inaugural wiremen certificate presentation to trainees on 22nd February 1986.

Courtesy visit to TEEAM by COEGA, South Africa in 2006.

TEEAM was entrusted to develop standards for E&E products and services with the appointment as Standard Writing Organisation (SWO) on 20th August 1999.

1986 was the beginning of a new era for the electrical contractors in the Asian and Pacific region where FAPECA (Federation of Asian Pacific Electrical Contractors Associations) was born. TEEAM through AFEEC became a part of FAPECA. In this bigger spectrum umbrella, TEEAM expanded ties with Korea, Hong Kong, Taiwan, Japan, Australia, New Zealand, United States and Hawaii.

Merger of SAFTEA & TEAM

There was an existing association called the Federation of Electrical Associations of Malaysia (FEAM) consisting of members from various state associations and SAFTEA was one of them. FEAM members then realised the need to recruit direct company members and FEAM was changed to The Electrical Association of Malaysia (TEAM). Both TEAM and SAFTEA had literally the same committee members, and more or less carrying out

the same activities. With a need to have a stronger national association, it was proposed to merge these two associations into one, thus forming a national association to bring the members of the electrical and electronics sectors under one umbrella. In order to merge the two associations, TEAM was eventually dissolved and SAFTEA changed its name to The Electrical and Electronics Association of Malaysia (TEEAM) on 29th October 1988. All members of TEAM were registered as TEEAM members.

TEEAM hosted the 10th AFEEC Convention in Kuala Lumpur in 2001.

The association continued to excel through the years in its effort to improve its standards for the industry. In 1984, electrical courses were conducted for electricians to produce a higher level of skilled personnel for the Malaysian electrical

industry.

Another significant event in 1989 was TEEAM's participation in an exhibition held

in conjunction with the historical meet of the Commonwealth Heads of Government in Kuala Lumpur. The exhibition themed "Understanding Malaysia" was organised by MITI to give our guests an understanding of the economic and social achievements of Malaysia as well as the business and investment opportunities available here.

In the 90's – Overseas Trade Missions

TEEAM began to organise overseas trade missions to explore business opportunities for members. The two notable missions were to Hannover Fair and Frankfurt Lighting Fair in 1990. The 20 odd members had very good business meetings with our counterparts from Germany. They also had the opportunity to visit the well-known Hannover Fair which boasted very spacious exhibition halls that took days to finish visiting. The exhibits on display back then were very impressive and advanced. TEEAM also organised a sizeable trade delegation to India's Eleccrama exhibition in 1999.

TEEAM Today

TEEAM is now accredited by the Energy Commission formerly known as the Department of Electricity and Gas Supply, to

conduct wiremen training courses. Besides this TEEAM also runs a building wiring installer course which is accredited and sponsored by the Construction Industry Development Board.

Courtesy visit to CIDB.

It is represented in government bodies such as the National Vocational Training Council and Technical Committees of SIRIM. Our association is appointed as a Standard Writing Organisation to draft standards for electrical and electronics products and services. We are also represented at many industry dialogues and meetings with the government. TEEAM also provides information and guidance pertaining to matters related to the electrical and electronics industry through the publication of "Suara TEEAM" newsletter and members directory. The Suara is distributed locally and overseas quarterly.

The association also offers academic excellence awards and scholarships to the children of its members and their employees. Scholarships were also offered to two scholars to pursue their Bachelor Degree in E & E Engineering in local universities. TEEAM also gave recognitions in terms of book prizes to local undergraduates pursuing their degrees in E & E Engineering.

Recreational and sports activities, such as golf, badminton, bowling and jogathon are organised yearly to promote fellowship among members. The latest to add to the list of games was table tennis. An inaugural treasure hunt was successfully held in 2011 with an overwhelming 100 over participants.

TEEAM also took part in international lighting forum and is now a member of the International Commission of Illumination (CIE). The Malaysia working committee is MyCIE and the committee challenges to become the "Centre of Excellence for Light and Lightings" in the Asean region in the future. Malaysia is the first national committee that joins as a country representative in this region.

TEEAM regularly received guests from trade organisation overseas to discuss economic cooperation and business collaboration. Representatives from World Bank and the Asean Secretariat have also visited the association to discuss issues of mutual interest.

Over the years, TEEAM has successfully built a good image and is well recognised by the government and the private professional bodies and trade organisations. Under the guidance of our dynamic leaders, TEEAM is moving forward amassing greater support and participation in government's policy formulation, regulations and standards development.

Dialogue with TNB.

Malaysia CIE Working Committee (MyCIE).

Inaugural treasure hunt on 27th March 2011.

To grow in strength and ensure effective representation, TEEAM urged everyone involved in the E & E industry to join TEEAM to safeguard your interests and rights. Through the dynamic leadership and commitment of the office bearers, the association will attain greater heights in the years to come to benefit its members.

Strong turnout at 2012 AGM.

Academic excellence awards 2012.

Down Memory Lane

Going down memory lane on yesteryear's event highlights

Office Bearers for the year 1973 – 1974.

Members participating in a Chinese Guild Seminar in 1959 on citizenship study organised by the Selangor State Press Department.

A networking gathering of TEEAM members in the early years.

Welcome reception of the 1st AFEEC Convention in Manila in 1979. Mr Andrew K M Voon and Dr K K Lim together with nine other Malaysian delegates attended the convention.

Members attending PEMA's 1st conference for electrical contractors, importers and dealers in Penang on 28th February 1959.

Musical band in the late 50s.

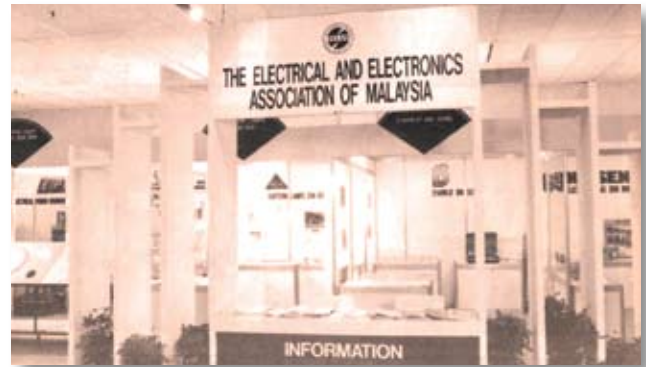

Association participated in a float procession on 1st February 1972 to celebrate Kuala Lumpur attaining city status.

Badminton team back in 1973.

TEEAM participated in the FAPECA Regional Conference & Executive Board Meeting in Hong Kong in 1993.

TEEAM participated in the CHOGM-Malaysia Exhibition in Putra World Trade Centre, Kuala Lumpur in 1989.

The Committee Members in charge of TEEAM's wiremen training course back in the 80's. (right) Mr Tan Swee Hee and Mr Khor Sow Hwa.

A trade delegation to Frankfurt & Hannover Fair in 1990.

AFECC Convention & Council Meeting in Singapore on 23rd September 1992.

The 1st Golf Competition was held on 17th November 1984 at Bentong Golf Club. Champion, Mr Hong Len Shun of Lim Kim Hai Electric (M) Sdn Bhd bottomed up. Sports Chairman, Mr Tony Yap (left) and Vice President Mr. Tan Eng Lim looked on.

ELENEX Malaysia 1994 Exhibition held in Putra World Trade Centre on 5th September 1994. The then Honourable Prime Minister YAB Dato' Seri Dr. Mahathir Mohamad was accompanied by TEEAM President, Mr Suresh Kumar J. Gorasia on a VIP tour to the exhibition hall.

YB Dato' Sri Peter Chin officiating the opening of TEEAM's Seminar on Type Test for LV Switchgear held on 9th December 1993.

TEEAM at FAPECA inaugural meeting in Seoul, Korea in 1986.

Annual Jogathon in Lake Garden, Kuala Lumpur.

20th AFEEC Council Meeting, Kuching in 1990.

A token of appreciation was presented to Penang Electrical Merchants Association for hosting TEEAM Council Meeting in Penang on 14th November 2009.

Good old times - VIPs at the Seminar on Electrical Insulation Oil held on 5th September 1996.

TEEAM contributed to the JE Humanitarian Fund in 1999.

Technical visit to Larsen & Toubro, India in 1999.

Technical visit to Petronas Twin Tower on 17th June 1999 in conjunction with AFEEC Council Meeting in Kuala Lumpur.

TEEAM celebrated its 48th anniversary in 2000.

TEEAM hosted the AFEEC/FAPECA meetings and Conferences in 2001. The events were held from 8th to 10th May 2001 at the Mines Resort City, Kuala Lumpur.

TEEAM at FAPECA Conference and Meeting in Hong Kong in 2000.

TEEAM signed an MOU with the Electrical Contractors' Association, UK, on 2nd May 2000 to promote trade cooperation and partnership in the electrical power sector.

TEEAM was appointed as a Standard Writing Organisation (SWO) by SIRIM on 20th August 1999. TEEAM is entrusted to prepare standards for electrical and electronics products and services.

Badminton Tournament back in 2000.

TEEAM collaborated with JCAA Japan to organise a training course on power cable and cable accessories in October/ November 2002.

Trade delegation to Elecrama 2004 and Taj Mahal, India.

Networking trip to Negeri Sembilan Electrical Engineering Association in 2004.

Courtesy visit to Malacca Electrical Contractors and Traders Association in 2004.

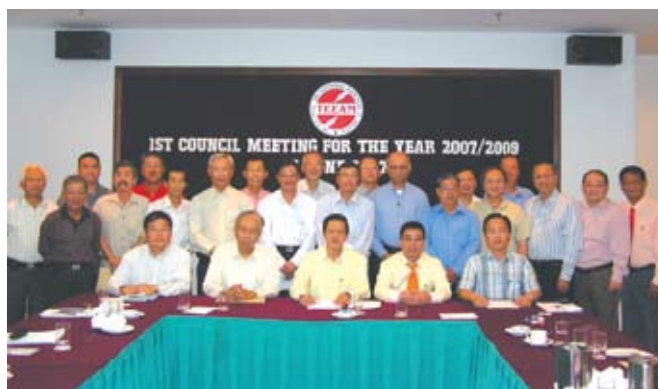

Malaysia hosted the 5th meeting of JSC ASEAN EE MRA in November 2004.

Trade delegation to SIEF 2005, Korea.

TEEAM at AFEEC Council Meeting in Chiangmai, Thailand in November 2005.

TEEAM Council Meeting hosted by Johor Bahru Electrical & Electronics Association on 16th June 2007 in JB.

TEEAM organised the EU Asia Interprise Business Meeting in Kuala Lumpur in 2006.

Table tennis tournament held in January 2011.

AOTS EE Training in Japan, 2010.

Electrical Association of Sarawak & Sabah joined TEEAM at SIEF 2004, Korea.

TEEAM at Sabah Electrical Association's 13th anniversary dinner.

Korea Electric Forum – An MOU was signed with KEMC Korea on 17th October 2011.

Annual Bowling Tournament.

The Perak Electrical Association hosted TEEAM Council Meeting in Ipoh on 6th January 2007.

TEEAM attended Sarawak Electrical Association Golden Jubilee Dinner on 27th November 2011.

Courtesy visit to CEO of TNB on 16th August 2012.

The Evolution of TEEAM's Newsletter

In an effort to update members on its regular activities and current trade information, TEEAM has been a consistent publisher of an in-house newsletter now known as Suara TEEAM. Over the past two decades, the contents have seen progressive improvement in terms of reports on association activities, trade news and technical information. In addition, TEEAM also produces the annual diary and calendar, and a biennial membership directory.

1984 January – 1984 November
In an effort to update members on the association's activities, the first newsletter was published in January 1984. The newsletter was printed in black & white in both English and Chinese versions.

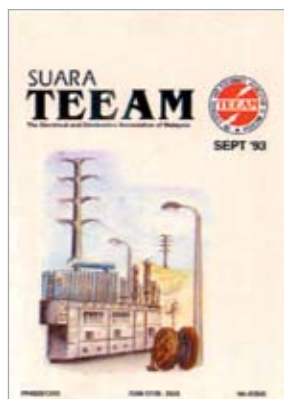

1985 July – 1987 December
In July 1985, the cover was designed with activity pictures. The text was changed to a new format to allow ease of reading for members.

1988 July – 1988 December
New cover design to reduce cost of printing.

1999 May – 2006 September
The cover design was changed to include the Malaysian flag and KL skyline to register a Malaysian identity.

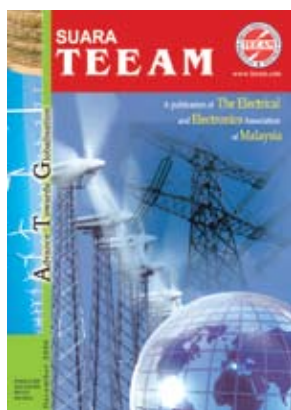

1993 September – 1998 September
The cover page was designed to include pictures of electrical power products to reflect the electrical & electronics industry.

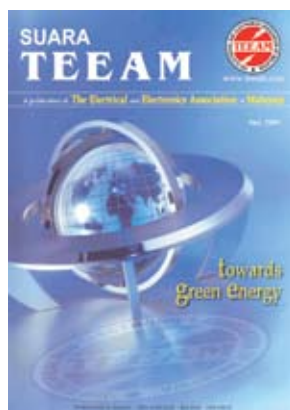

1990 June – 1992 December
Since June 1990 the cover was designed with a lightning sign to reflect the electrical industry. Later colour advertisements were introduced. In December 1991, Similli paper was changed to Art paper to ensure a better quality printout especially for our advertisers.

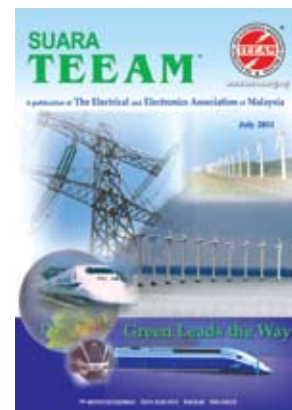

1989 July – 1989 December
In line with the association's name change, it was then renamed to "Suara TEEAM" and printed in English only.

2006 December - 2009 January
Recouping from the global financial crisis in 2007, Malaysia is ready to enter its next phase of growth towards 2020, with even greater emphasis on various power resources and infrastructures to pave the way towards speedier industrialisation as a global player.

2009 July – 2011 February
The awareness of global warming has underscored the critical importance of "Going Green", and the necessity to engage the participation of every country in the world. Towards this end, the electrical and electronics industries in Malaysia are poised to take on this vital role.

2011 July till Now
The "Green Concept" continues and the Malaysian government's ambitious transformation programmes have been initiated to catapult the country into the fast lane of growth along with global development trend to ensure the attainment of our Vision 2020.

ABB Low Voltage Products

Quality products for diverse application

ABB low voltage circuit breakers, switches and control products protect people, buildings and equipment from electrical overloads. ABB line protection products, wiring accessories, enclosures and cable systems control and protect building installations. When integrated with ABB intelligent building automation systems, energy consumption is optimized and controlled through automated adjustment of lights, heat and ventilation. For more information, visit www.abb.com/lowvoltage
